EDUCATION

Western University *(University of Western Ontario)* **Graduated: Jun 2026**
B.Sc., Honors Specialization in Computer Science *(Dean's List 2024 - 2026)*

WORK EXPERIENCE

Software Developer - *SOTI* **Jun 2026 - Present**
- Built MobiControl policy-assignment APIs with C#/.NET services and SQL Server, validating device-group targets and persisting configuration to achieve 240 ms p95 response latency in staging.
- Reduced policy-assignment reads from 8 to 2 SQL queries per device check-in by batching SQL Server lookups and indexing the keys used to resolve applicable device-group policies.
- Verified consistent compliance results and rejection of unauthorized changes with C# unit and API integration tests covering permission failures, overlapping policies and repeated device check-ins.
- Made Android compliance failures easier to investigate by recording the OS-version and device-property criteria that failed when evaluating assigned policies during device check-in.

Software Developer Intern - *Solink* **Sep 2025 - May 2026**
- Improved C++ stream-handler reliability with bounded backoff, socket timeouts and file-descriptor cleanup, reducing median camera reconnection time from 45 to 30 seconds in fault-injection tests.
- Added C++ telemetry for camera connectivity, disk capacity and latest recording timestamps on Linux devices, cutting median recorder-issue triage time from 15 to 10 minutes in support replay tests.
- Led the migration of 20+ pages from Vue to React/TypeScript on Vite, porting shared state and UI components and cutting CI build times from 12 minutes to 4 minutes.

Software Developer Intern - *Loblaw Digital* **Sep 2023 - Dec 2023**
- Made rejected product events recoverable by extending Scala data-contract checks in Pub/Sub-to-Dataflow data pipelines, routing failures to dead-letter tables and adding GitLab CI replay tests before reprocessing.
- Excluded 120 incomplete records from a 10,000-product evaluation dataset with Python and BigQuery checks that reconciled product identifiers, prices and inventory snapshots for Helios recommendations.
- Validated Helios YAML model references, filter parameters and REST result limits before deployment, catching 12 invalid profiles across 60 staging configuration changes.

Data Engineer Intern - *Scotiabank* **Jan 2023 - Apr 2023**
- Identified 30+ reconciliation discrepancies before downstream reporting with Python and SQL checks for account keys, duplicate transactions and ledger control totals in banking analytics datasets.
- Added SQL freshness checks and Splunk alerts to distinguish late source feeds from failed transformations, reducing pipeline failure-detection time from over 4 hours to under 10 minutes.
- Containerized Python batch-scoring jobs with Docker and validated input schemas and model artifacts in CI, making releases reproducible across development and test environments.

PROJECTS

DeezedAI App | React Native · TypeScript · Fastify · PostgreSQL · Clerk · OpenAI · Replicate GitHub
- Launched personalized physique analysis for **100 monthly active users** by building a React Native app backed by Fastify, Clerk and PostgreSQL, with OpenAI feedback and Replicate image transformations.

TaintGate | Python · SQLite · MCP · JSON-RPC 2.0 · W3C Trace Context GitHub
- Built a Python/SQLite MCP gate that tracks untrusted data through agent memory and blocks unsafe tool requests, passing 96 adversarial tests with no successful exfiltration in the test suite.

SKILLS

Languages: Python, C#, C++, TypeScript/JavaScript, SQL, Scala
Backend & APIs: .NET, Node.js, Fastify, REST APIs, OAuth 2.0, SOAP, Model Context Protocol (MCP)
Data & Cloud: SQL Server, PostgreSQL, BigQuery, Pub/Sub, Dataflow, Docker, AWS, Google Cloud
AI & Frontend: OpenAI APIs, GPT-5, Model Evaluation, React, React Native, Expo
Testing & Systems: Unit Testing, Integration Testing, CI/CD, GitLab CI, Linux, Splunk
Interests: Golf (10 handicap), Chess (1500 Elo), Tennis, Strength Training, Snowboarding

PROGRAMS & CERTIFICATIONS

Stanford Online - XCS224N: Natural Language Processing with Deep Learning (Completed) Jun 2026
AWS Certified Solutions Architect - Associate Mar 2026
